

SETEC Elevators is Keeping Up with the Jetson's Vacuum Elevators Once Seen Only in Cartoons Are Now A Reality and SETEC is a Distributor!

August 18, 2007 - SETEC Elevators, www.SetecElevators.com, a Texas independent elevator contractor, established a strategic partnership with Pneumatic Vacuum Elevators, LLC to provide the latest in space-age technology home elevators

Come see for yourself! SETEC Elevators is now selling Pneumatic Vacuum Elevators! These elevators are the very FIRST PNEUMATIC VACUUM ELEVATORS IN THE WORLD!

They bring a whole new perspective to owning a home elevator. They are stylish, elegant, compact, environmentally friendly, reliable, and functional!

These elevators only require a 37" diameter of your home's living space. What is even better is what they don't require. They require no pit excavation, no hoistway construction, no machine room, and no costly infrastructure.

These revolutionary machines are green too. They consume zero energy during decent and only require 220 volt turbines to ascend! They move up using only the force of suction and down using the all natural forces of gravity.

This air drive system allows pneumatic elevators to provide the highest safety during power outages and any involuntary decent.

In addition, these elevators require the lowest maintenance in the industry as there are no parts which require lubrication.

In addition to exceptional price and value, these elevators boast a panoramic 360° view as you glide between levels.

When you need a lift, you need the elevator experts at SETEC Elevators. We can offer you all the options available in the market, explain the differences, and help you get the best value on your new home addition.

About SETEC Elevators

SETEC Elevators is a full service elevator contractor offering elevator services, repairs, modernizations, installations, and custom solutions for commercial, industrial, and residential lifting concerns.
